

Nipun Maisheri

240-665-9411 | maisherinipun@gmail.com | nmaisheri.github.io | Clarksburg, MD | U.S. Citizen

EDUCATION

University of Maryland

B.S. Computer Engineering; Data Science Minor, Cybersecurity Specialization

- Claude Builders Club, Google Developer Club
- Relevant Coursework: Applications of R for Data Science, Probability and Statistics 1, Intro to MATLAB, Object Oriented Programming 1 & 2, Intro to Computer Systems, Discrete Mathematics, Python for Data Science

College Park, MD

Expected May 2028

Montgomery College

A.S. Cloud Computing and Networking Technology; Dean's List, P-TECH Program, GPA: 3.9

- Relevant Coursework: Network Security, Network & Cloud Forensics, Cloud Administration, Network & Cloud Infrastructure, Network Virtualization

Germantown, MD

May 2024

EXPERIENCE

Teaching Fellow

ENES100, University of Maryland

- Selected to teach Arduino programming and embedded hardware prototyping, supporting student engineering teams building CAD-designed products in the Keystone Laboratories
- Training to safely operate shop and fabrication tools (soldering irons, 3D printers, laser cutters, power tools) to support lab supervision and troubleshoot student hardware/software designs

Fall 2026 (Incoming)

College Park, MD

Software Engineering Intern

Sparksoft Corporation

- Developed and analyzed test code for an automated platform processing 10,000+ test cases, ensuring secure data handling for mission-critical infrastructure
- Applied secure data handling practices while working with platform test data, validation workflows, and SDLC processes in an Agile engineering environment

June 2025 – August 2025

Columbia, MD

Student IT Worker

University of Maryland School of Public Health

- Triaged and resolved 15+ weekly technical support tickets using Jira, supporting reliable technology operations for university staff and programs
- Synthesized recurring support patterns to author internal documentation and runbooks, reducing repeat ticket volume

Feb 2025 – Present

College Park, MD

PROJECTS

Interactive AI Learning Agent | *Python, FastAPI, LangChain, RAG, MCP*

- Engineered a Python/FastAPI backend service powering an AI learning agent, exposing API endpoints for LLM-assisted content processing and structured student-facing responses
- Integrated Claude through LangChain and retrieval-augmented generation workflows, reducing hallucination rates by 41% through improved context retrieval and response validation
- Implemented Model Context Protocol workflows to securely connect LLM capabilities with local data sources while maintaining controlled data access

Feb 2026 – Present

Vacation Planning Website | *MySQL, Data Pipelines*

- Developed MySQL database scripts and data integration pipelines to store, query, and manage user preferences and destination data
- Designed relational data structures to support personalized vacation recommendations, improving organization of user inputs and destination metadata

Feb 2026 – Present

Smart Clipboard Manager | *Swift, SwiftUI*

- Researched new tools, techniques, and code libraries to build a prototype application focused on text summarization, tackling complex exploratory software challenges
- Acted as a self-guided disruptor to outbuild standard architecture, utilizing creative problem-solving to demonstrate the value of new technologies within a fast-paced development cycle

May 2025 – September 2025

CERTIFICATIONS AND SKILLS

Languages: Python, JavaScript, SQL, Java, HTML/CSS, SwiftUI

Cloud & Tools: AWS, Azure, React, Git, Jira, Linux, Microsoft 365

Certifications: CompTIA A+, Testout PC and Network Pro
